SPECTROCHIMICA ACTA
PART A: MOLECULAR SPECTROSCOPY

EDITORS

UNITED KINGDOM

Professor Sidney Kettle, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ, U.K.

UNITED STATES OF AMERICA

Professor Jeffrey Steinfeld, Department of Chemistry, Massachusetts Institute of Technology, Cambridge, MA 02139, *U.S.A.*

ASSOCIATE EDITOR

Dr P. J. Hendra, *Department of Chemistry, University of Southampton, Southampton S09 5NH, U.K.*

REVIEWS EDITOR

Professor Michael D. Morris, *Department of Chemistry, University of British Columbia, Vancouver, British Columbia, Canada V6T 1Y6*

Production Editor: Thomas Merriweather, Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England.

Publishing and Advertising Offices: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England (Tel. Oxford 794141); and Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

One volume *per annum*. Published monthly plus additional issues in July and November.

Annual Institutional Subscription Rates 1994: North, Central and South America, U.S.$1270.00; Rest of World £826.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Second class postage paid at RAHWAY, NJ, and additional mailing offices. Postmaster send address corrections to *Spectrochimica Acta Part A*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

CONTENTS OF VOLUME 49A

No. 1 January

General Papers

P. CARMONA, M. MOLINA and R. ESCOBAR: Studies on aminopyridines in aqueous solution by laser Raman spectroscopy 1

C. O. DELLA VÉDOVA, H. G. MACK and H. OBERHAMMER: Determination of the conformation in thioester compounds containing the –NSO group through pre-resonance Raman study: spectroscopic properties of S(*N*-sulphinylimine)-fluorocarbonylsulphane, FC(O)SNSO 11

Z. X. SHEN, M. H. KUOK, S. H. TANG and W. F. SHERMAN: Infrared study of phases III, IV and V of NH_4NO_3 21

HAMID NAJIB, NAJATE BEN SARI-ZIZI and CLAUDE ALAMICHEL: Rovibrational study of the $\nu_2 + \nu_4^{\pm 1}$, $\nu_2 + 3\nu_6^{\pm 1}$, $\nu_1 + \nu_5^{\pm 1}$, $\nu_4^{\pm 1} + \nu_5^{\mp 1}$, $\nu_4^{\mp 1} + \nu_5^{\mp 1}$, $\nu_5^{\mp 1} + 3\nu_6^{\mp 1}$, $\nu_5^{\pm 1} + 3\nu_6^{\mp 3}$ and $\nu_1 + \nu_2$ infrared bands of $CH_3{}^{35}Cl$ studied in a high-resolution FTIR spectrum from 4250 to 4600 cm^{-1} 31

JOSÉ FERNÁNDEZ BERTRÁN and EDILSO REGUERA RUÍZ: Study of the nature of the interaction of CH_3CN with Lewis acids 43

N. SANTHA, V. U. NAYAR and G. KERESZTURY: Vibrational spectra of $M^{II}_3Pb(P_2O_7)_2$ (M^{II} = Ni, Co) . . . 47

K. S. PANDEY, B. P. ASTHANA and P. C. MISHRA: Infrared and Raman spectra of 8-azaguanine and 8-azaadenine 53

K. ANNAPURNA and S. BUDDHUDU: Fluorescence of Eu^{3+}-doped InF_3-based optical glasses 73

KEN OHWADA: Application of potential constants: molecular chemical potential changes on formation of heteronuclear diatomic molecules—VI 81

K. HASSLER und R. NEUBÖCK: Synthese, Kernresonanz- und Schwingungs-spektren der Hexamethyltrisilane $X_2MeSiSiMe_2SiMe_3$, X = H, F, Cl, Br, I, Ph, OMe, OSO_2CF_3 95

A. PIART-GOYPIRON, M. H. BARON, H. ZINE, J. BELLOC and M. J. COULANGE: Vibrational spectra of *N*-2′-methyl-propyliden-propan-2-amine: conformational analysis and influence of the nitrogen hybridization 103

RAMADAN M. RAMADAN, WAGIHA H. MAHMOUD, ATTIA S. ATTIA and M. F. EL-SHAHAT: The synthesis, spectral and magnetic properties of the complexes of chromium with chrysenequinone and chrysenequinonemonoxime 117

AKIO KUWAE, KAZUHIKO HANAI, KAORU OYAMA, MASAZUMI UCHINO and HO-HI LEE: Solid state structures of phenylpyruvates as studied by high resolution ^{13}C NMR spectroscopy 125

P. N. GAPONIK, O. A. IVASHKEVISH, V. N. NAUMENKO, T. B. KOVALYOVA, T. N. ANDREEVA and A. O. KOREN: ^1H, ^{13}C and ^{15}N NMR study of vinyltetrazolium salts and processes of their synthesis. 135

Book Review 145

Papers in Press 147

No. 2 February

General Papers

J. L. DUNCAN, A. M. FERGUSON and S. T. GOODLAD: Local mode interpretation of the CH and CD stretching vibrational manifolds of isotopic ethylenes, C_2H_3D and C_2HD_3 149

P. K. JENKNER, A. SPIELBERGER, M. EIBL und E. HENGGE: ^{29}Si NMR Spektroskopie von Cyclopentasilanen 161

K. KNEIPP and H. KNEIPP: Time-dependent SERS of pseudo-isocyanine on silver particles generated in silver bromide sol by laser illumination 167

BERNARD JUSKOWIAK: Efficient quenching of the fluorescence of binaphthyl-based amphiphiles by iodine 173

MAMDOUH SAYED SOLIMAN: Normal coordinate and infrared band intensities of trichloronitromethane and trichloroacetate ions 183

B. MÜLLER, H. D. LUTZ, J. HERMELING and E. KNÖZINGER: Raman studies of solid hydrogen cyanide (HCN, DCN) and of HCN argon matrices 191

DANIEL BOUGEARD, CLAUDE BRÉMARD, ROGER DE JAEGER and YAHIA LEMMOUCHI: Conformational stability and force field of chloromonophosphazenes: MNDO calculations, vibrational spectra and normal coordinate analyses of $Cl_3PNP(X)Cl_2$ (X = O, S) and $[Cl_3PNPCl_3][Y]$ (Y = Cl, PCl_6) 199

MAJDA SEKKAL and PIERRE LEGRAND: A spectroscopic investigation of the carrageenans and agar in the 1500–100 cm^{-1} spectral range 209

K. RAMU, C. G. RAMA RAO and C. SANTHAMMA: Two electronic transitions in the near-UV region of six isomeric difluorobenzonitriles—I 223

DAVID M. ADAMS and JULIAN HAINES: Phase transitions in the dimethyl thallium(III) halides, $(CH_3)_2TlX$(X = Cl, Br, I) 237

WILLIE ALVES BUENO and FABIO MORGADO: Hydrogen bonding of adenine with benzoic acids in the solid state. An FTIR study 249

XUEFENG ZHOU, PETER PULAY, RICHARD HARGITAI, ANDRAS STIRLING and JANOS MINK: Complete assignment of vibrational spectra of 1,5-cyclooctadiene—a theoretical and experimental infrared and Raman study 257

G. CASSANAS, G. KISTER, E. FABRÈGUE, M. MORSSLI and L. BARDET: Raman spectra of glycolic acid, L-lactic acid and D,L-lactic acid oligomers 271

Short Notes

BIELUONWU AUGUSTUS UZOUKWU: Spectroscopic studies of manganese(II) and zinc(II) complexes of 1-phenyl-3-methyl-4-acylpyrazolone-5 281

A. K. KALKAR and N. M. BHOSEKAR: Raman and FTIR vibrational spectroscopic study of 3-amino pyrazine carboxylic acid 283

Research Notes

RUIFANG SONG, FEI LI and LIANG LI: The mechanism of the intramolecular rearrangement of HEDTA metal complexes—the dynamic NMR study 285

V. P. EVANGELOU and J. WANG: Differences between infrared spectra of atrazine obtained under transmittance and diffuse reflectance modes 291

Announcement 297

Papers in Press 299

No. 3 March

General Papers

DANUTA MICHALSKA: The Raman and IR spectra and normal coordinate analysis of 3-(*N*-phenylacetylamino)-2,6-piperidinedione, Antineoplaston A10, the new antitumour drug 303

B. ALKENINGS, H. BETTERMANN, I. DASTING and H.-J. SCHROERS: Kinetic studies of the laser-induced photodecarbonylation of 3,5-di-tert-butyl-1,2-benzoquinone 315

ARMANDO CODOÑER, PIEDAD MEDINA, CARLOS ORTIZ and E. JOVER: Spectroscopic study of molecular associations between riboflavin and some (dihydro) β-carboline derivatives 321

H. EL ALAOUI EL ABDALLAOUI and P. RUBINI: ^{31}P and ^{17}O nuclear spin–lattice relaxation in some phosphorylated molecules. Determination of ^{31}P spin–rotation coupling constants, ^{17}O quadrupolar coupling constants and chemical shielding anisotropy of the ^{31}P nucleus. 329

LI CHONG-DE, JIANG LI-JUAN and TANG WEN-XIA: Vibrational spectra and normal coordinate analysis for *cis*-diamminetetrachloroplatinum 339

S. KLEE and J. F. OGILVIE: The fundamental vibration–rotational band of gaseous DCl in absorption at 297 K and at 12 K 345

T. SCHÖNHERR, U. ROSELLEN and H.-H. SCHMIDTKE: Normal vibrations of $[M(acac)Cl_4]$, M = Sn(IV), Sb(V) 357

BORIS GALABOV, TODOR DUDEV and SONYA ILIEVA: Interpretation of vibrational absorption intensities: effective bond charges from rotation free atomic polar tensors 373

A. MINIEWICZ, Y. MARQUETON and R. POPRAWSKI: Far-infrared reflectivity study in optically non-linear crystal of potassium pentaborate 387

J. GEORGES and J. M. MERMET: Simultaneous time-resolved fluorescence and thermal lens measurements: application to energy transfer studies in europium chelates 397

P. VERBIEST, L. VERDONCK and G. P. VAN DER KELEN: Charge transfer spectra of organometallic complexes—IX. Evaluation of solvent effects on the electron donor–acceptor interactions between trimethyltinisothiocyanate and iodine 405

ABOLFAZL SEMNANI and MOJTABA SHAMSIPUR: Spectroscopic study of charge transfer complexes of some benzo crown ethers with π-acceptors DDQ and TCNE in dichloromethane solution 411

NORMAN KULEVSKY and KEN PIERCE: The formation of bifurcated charge transfer complexes with molecular iodine 417

L. A. GRIBOV, I. E. DAVIDOVA, F. BAYARD, C. DECORET and J. ROYER: Calculation of vibrational frequencies of α para-dichlorobenzene crystal. 425

Short Note

SALMAN R. SALMAN and SABRI M. AL-MARSUMI: Molecular complexes of crown ethers—Part 1. Complexes between crown ethers and iodine 435

Research Notes

M. M. AYAD, S. A. EL-DALY and S. A. AZIM: A spectroscopic study of charge transfer complexes of 7-diethylamino-4-methylcoumarine laser dye 437

S. CHATTOPADHYAY and S. K. BRAHMA: RRS studies of 2′-carboxy benzene 2-azonaphthol in neutral solution and its SERRS in silver sol 443

Book Review 449

Announcement 451

Papers in Press 453

No. 4 April

General Papers

H. G. M. EDWARDS, A. F. JOHNSON, I. R. LEWIS and S. J. WHEELWRIGHT: Raman and FTIR spectroscopic studies of copolymers of methyl methacrylate with butadiene 457

JORMA HÖLSÄ, BERNARD PIRIOU and MARKKU RÄSÄNEN: IR- and Raman-active normal vibrations of rare earth oxyfluorides, REOF; RE = Y, La, and Gd 465

IVAN BARALDI, ANNAMARIA CARNEVALI, FABIO MOMICCHIOLI and GLAUCO PONTERINI: Electronic spectra and *trans–cis* photoisomerism of carbocyanines. A theoretical (CS INDO CI) and experimental study 471

H.-J. GÖTZE, B. BARTYLLA und M. ISMEIER: Schwingungseigenschaften von Tris-(trimethylsilyl)silylamin und *t*-butyl-substituierten Organoelementaminen der IV.Hauptgruppe 497

HANS H. EYSEL and RÜDIGER WAGNER: Raman intensities of liquids: absolute scattering activities and electro-optical parameters (EOPs) of arsenate and selenate ions in aqueous solutions 503

G. HATEM, C. COLÓN and J. CAMPOS: Study of CN emission from a laser induced plasma of graphite in air 509

O. P. SINGH, R. P. SINGH and R. N. SINGH: Polarized Raman spectra, thermodynamic functions and barriers to internal rotation of 2,3-dimethoxy toluene 517

M. M. VERGARA and E. L. VARETTI: The infrared spectra of lithium nitroprusside dihydrate, $Li_2[Fe(CN)_5NO].2H_2O$ 527

J. A. GÜIDA, P. J. AYMONINO, O. E. PIRO and E. E. CASTELLANO: Infrared spectra and molecular structure of excited electronic metastable states of the nitroprusside anion, $[Fe(CN)_5NO]^{2-}$ 535

S. CHAKRAVORTI, R. DE, P. K. MALLICK and S. B. BANERJEE: Vibrational spectra and molecular configuration of 2,2′-diphenyl ethyl alcohol and 2,2′-diphenyl ethylamine 543

H. Rostkowska, M. J. Nowak, L. Lapinski, M. Bretner, T. Kulikowski, A. Leś and L. Adamowicz: Infrared spectra of 2-thiocytosine and 5-fluoro-2-thiocytosine; experimental and *ab initio* studies . . 551

Luiz Fernando C. de Oliveira and Paulo S. Santos: Resonance Raman investigation of Co(III) salen nitrophenolate complexes 567

A. Allouche and J. Pourcin: *Ab initio* calculation of vibrational force fields: determination of non-redundant symmetry coordinates by least-square component analysis 571

Yong Zhou and Guozhen Wu: The study of phase transition of KHF_2 doped with sodium ions with Raman intensities of the lattice modes as the order parameter 581

S. Chattopadhyay and S. K. Brahma: Vibrational spectra of isomeric pyridinic carboxylic acids in solid state and in solution and their SERS studies in silver sol 589

Short Notes

S. Lakshmi Reddy, B. J. Reddy and P. S. Rao: Optical absorption and EPR spectra of VO(II) in wavellite. 599

Fadhil S. Kamounah and S. R. Salman: ^1H NMR study of some sterically crowded substituted phenols 601

Book Review 603

Papers in Press 605

No. 5/6 May/June

***Special Issue*: Applications of Fourier transform Raman spectroscopy—III**

Editorial. 609

A. J. Sommer and J. E. Katon: Performance enhancement of a Fourier transform Raman microprobe 611

Charles E. Miller: Near-IR Fourier transform Raman spectroscopy and PLS-2 modeling for improved understanding of near-IR spectra. 621

S. M. Mason, N. Conroy, N. M. Dixon and K. P. J. Williams: The development of a sensitive near-IR Raman system 633

Chris Petty and Natalie Cahoon: The analysis of thin layer chromatography plates by near-infrared FT-Raman 645

Stewart F. Parker, Niamh Conroy and Vijay Patel: Some consequences of the Fourier transform in Fourier transform Raman spectroscopy 657

Ray L. Frost, Peter M. Fredericks and John R. Bartlett: Fourier transform Raman spectroscopy of kandite clays 667

A. M. Tudor, C. D. Melia, M. C. Davies, D. Anderson, G. Hastings, S. Morrey, J. Domingos-Sandos and M. Barbosa: The analysis of biomedical hydroxyapatite powders and hydroxyapatite coatings on metallic medical implants by near-IR Fourier transform Raman spectroscopy 675

N. L. Ross: Fourier transform Raman spectroscopy at high pressures: preliminary results of sulphur to 56 kbar 681

J. P. Bourke, R. D. Cannon, R. Grinter and U. A. Jayasooriya: A single-crystal Fourier transform Raman spectroscopic study of $[Cr_3O(OOCCH_3)_6(H_2O)_3]Cl \cdot 5H_2O$ 685

Chris Dyer, Patrick J. Hendra, Willis Forsling and Maine Ranheimer: Surface hydration of aqueous γ-Al_2O_3 studied by Fourier transform Raman and infrared spectroscopy—I. Initial results 691

H. G. M. Edwards, A. F. Johnson and I. R. Lewis: A vibrational spectroscopic study of tris triphenyl phosphine rhodium (I) chloride. 707

Chris D. Dyer, Patrick J. Hendra and Willis Forsling: The Raman spectroscopy of cement minerals under 1064 nm excitation 715

J. A. Haigh, P. J. Hendra, A. J. Rowlands, I. A. Degen and G. A. Newman: Raman spectroscopy of thiosulphates 723

NEIL EVERALL: An investigation of the potential of near-IR Raman spectroscopy for recording non-resonance Raman spectra of azo dyes 727

HIROFUMI OHTSUKA, YUKIO FURUKAWA and MITSUO TASUMI: Dependencies of the Raman spectra of *p*-oligophenyls on the chain length and the excitation wavelength 731

C. J. DEBAKKER, G. A. GEORGE, N. A. ST JOHN and P. M. FREDERICKS: The kinetics of the cure of an advanced epoxy resin by Fourier transform Raman and near-IR spectroscopy 739

B. J. BRISCOE, B. H. STUART and S. ROSTAMI: A Fourier transform Raman spectroscopy study of the crystallization behaviour of poly (ether ether ketone)/poly (ether imide) blends 753

A. M. TUDOR, C. D. MELIA, M. C. DAVIES, S. J. CHURCH and J. HELLER: The analysis of biomedical poly(ortho esters) by near-IR Fourier transform Raman spectroscopy 759

S. BRUNSGAARD HANSEN, D. H. CHRISTENSEN and O. FAURSKOV NIELSEN: Low frequency near-IR Fourier transform Raman studies of hydrogen bonding in nylons 769

S. J. BUNCE, H. G. M. EDWARDS, A. F. JOHNSON, I. R. LEWIS and P. H. TURNER: Synthetic polyisoprenes studied by Fourier transform Raman spectroscopy 775

TONY A. MATTIOLI, ANDREAS HOFFMANN, D. G. SOCKALINGUM, BERNHARD SCHRADER, BRUNO ROBERT and MARC LUTZ: Application of near-IR Fourier transform resonance Raman spectroscopy to the study of photosynthetic proteins 785

B. W. BARRY, A. C. WILLIAMS and H. G. M. EDWARDS: Fourier transform Raman and IR spectra of snake skin 801

E. A. CUTMORE and P. W. SKETT: Application of Fourier transform Raman spectroscopy to a range of compounds of pharmaceutical interest 809

IRA A. WEINSTOCK, RAJAI H. ATALLA, UMESH P. AGARWAL, JAMES L. MINOR and CHRIS PETTY: Fourier transform Raman spectroscopic studies of a novel wood pulp bleaching system 819

R. B. LOWRY: Fourier transform SERS studies of the chemisorption of ferricyanide on gold electrode surfaces 831

L. MARKWORT and P. J. HENDRA: Hazards associated with the use of electro-chemically prepared substrates in the qualitative analysis of aqueous solutions by surface-enhanced Raman spectroscopy 837

G. M. WARNES: The measurement of small band shifts using Fourier transform Raman spectroscopy and curve fitting: the acetone H_6/D_6 system 845

I. A. DEGEN and G. A. NEWMAN: Raman spectra of inorganic ions 859

List of Special Issues. 889

No. 7 July

General Papers

R. A. YADAV: Force fields for benzoylchloride—I. Vibrational assignments of non-planar modes revisited 891

P. SAMBASIVA RAO: Single crystal EPR study of Mn(II)-doped magnesium potassium Tutton's salt . . . 897

MARIO R. RETA, ROSA CATTANA, JORGE D. ANUNZIATA and JUANA J. SILBER: Solvatochromism of anthraquinone and symmetrical dihydroxy derivatives. Local interactions 903

H. G. M. EDWARDS, D. W. FARWELL, A. C. WILLIAMS and B. W. BARRY: Raman spectroscopic studies of the skins of the Sahara sand viper, the carpet python and the American black rat snake 913

JAN FLORIÁN and VOJTĚCH HROUDA: Scaled quantum mechanical force fields and vibrational spectra of solid state nucleic acid constituents V: thymine and uracil. 921

M. IKRAM, M. A. RAUF and Z. JABEEN: Solvent effects on the Si—Cl stretching bands of dimethyldichlorosilane by IR spectroscopy 939

C. J. NIU and Y. Q. JIA: X-Ray photoelectron spectra of some bioinorganic complexes of the rare earths with *N*-acetylalanine 947

XUEFENG ZHOU, RUIFENG LIU and PETER PULAY: Theoretical study on the structures, force field, and vibrational spectra of cyclooctatetraene and cyclooctatetraene-d_8 953

M. L. Rodriguez-Mendez, R. Aroca and J. A. DeSaja: Spectroscopic and electrochemical properties of thin solid films of yttrium bisphthalocyanine 965

Eric Faulques, Richard E. Russo and Dale L. Perry: Raman spectral studies of uranyl sulphate and its urea complex structural isomers. 975

C. Santhosh and P. C. Mishra: Electronic structures and spectra of 6-mercaptopurine and 6-thioguanine 985

M. H. Rahman, B. P. Dwivedi, Y. Kumar and B. N. Khanna: Low frequency Raman spectra of barium borate glasses in the system $(BaCl_2)_y[(BaO)_x(B_2O_3)_{1-y-x}]_{1-y}$ for various x and y 995

Hassan S. Ghaziaskar and Edward P. C. Lai: Internally amplified stimulated Raman spectroscopy. . 1003

Mingming Fang, Tianjian Huang, Tiren Gu, Yujun Mo, Zhaoxiang Wang and Xiuying Li: Surface enhanced Raman scattering of surfactants adsorbed on silver mirror surfaces. 1009

Y.-Q. Jia: Calculations for the vibration frequencies of the O—H···O bond in KH_2PO_4 by a semiempirical method 1015

Short Notes

Gamal A. Gohar, Ezzat A. Hamed, Ali A. El-Bardan and A. A. Abdallah: Solvent and substituent effects on the absorption spectra of 4-substituted methyl-3-nitrobenzoic acids. 1021

Salim Y. Hanna, Jasim M. A. Al-Rawi and Amir A. Al-Rahman: Solvent effect on α-proton chemical shifts of α, *N*-diarylnitrones. 1022

David Tudela and Jose M. Calleja: Tin–carbon and tin–chlorine stretching frequencies in triphenyltin chloride 1023

K. C. Medhi and R. N. Medhi: Electronic spectra of 2-chloro-5-bromopyridine. 1024

Sonia Martínez: Ethanol/*n*-hexane system—IV. NMR studies 1025

E. Norambuena V, O. Reyes V and J. Valenzuela: Solvent dependence of linewidth studies in the electron spin resonance spectra of the dianion radicals *p*- and *m*-nitrobenzoates 1026

K. Sarma, T. S. Basu Baul, W. L. Basaiawmoit and R. Saran: Synthesis and structural characteristics of some arylazodyes derived from salicyldehyde and salicylic acid—Part I 1027

S. Choudhury, T. S. Basu Baul, P. K. Bajpai and W. L. Basaiawmoit: Spectral characteristics of some biologically significant chelating Schiff bases 1028

Research Notes

T. Balaji and S. Buddhudu: Fluorescence spectra of Tb^{3+}-doped powder phosphors 1029

K. S. Wang, P. Yuan and M. Schwartz: Reorientation diffusion of hexafluorobenzene and benzene in binary liquid mixtures 1035

Book Reviews 1039

Papers in Press 1041

No. 8 July

Editorial Announcement. 1045

General Papers

C. O. Della Védova, R. M. Romano and Thomas Heß: Pre-resonance Raman, IR, ^{19}F, ^{13}C, ^{15}N NMR, mass, and UV spectra in —NSO containing compounds: study of *S*(*N*-sulfinylimine)-perfluoromethyl-disulphane, CF_3SSNSO 1047

I. K. Lednev, O. A. Fyedorova, S. P. Gromov, M. V. Alfimov, J. N. Moore and R. E. Hester: A Raman spectroscopic study of photochromic benzothiazolium dyes 1055

J. Hanuza, M. Andruszkiewicz, K. Hermanowicz, R. Horyń and J. Klamut: Infrared and Raman spectra and external mode calculations for $M_2Cu_2O_5$ semiconductors (M = In, Sc, Y and lanthanides from Tb to Lu). 1065

D. C. McKean, A. L. McPhail, H. G. M. Edwards, I. R. Lewis, V. S. Mastryukov and J. E. Boggs: Vibrational spectra in the ν(SiH) and ν(SiD) regions of chloro and bromodisilanes and *ab initio* geometry studies of C_2H_5Cl, Si_2H_5Cl and 1,1-$Si_2H_4Cl_2$ 1079

D. C. McKean and I. Torto: Infrared studies of SiH bonds and the structures of methylsilylamines and ethers 1095

Christian Laurence, Maryvonne Luçon, Han Joong Koh and David G. Morris: Substituent effects in IR spectroscopy—XII. Field effects of 4-substituents on the cyclopropyl ν(CH) vibrator of tricyclenes 1105

M. Alhassan, J. F. Robert, A. Xicluna, J. E. Ombetta, R. Mercier et B. Laude: Etude RMN^{1}H et radiocristallographique de la stéreochimie de 3-aryl-9*b*-hydroxy-1,3,3*a*,9*b*-tétrahydro-4*H*-thiéno[3,4-*c*] benzo[*e*]pyrane-1-carboxylates d'éthyle. Configuration et conformation 1109

D. Vijayaraghavan and J. Ramakrishna: Pulsed NMR study of molecular motions and phase transitions in $[N(CH_3)_4PbX_3$ (X = Cl, Br, I) 1121

Kazuhiko Hanai, Yoshifumi Maki and Akio Kuwae: Vibrational spectra of β-lactams—III. Potassium 2-azetidinone-1-sulfonate and its isotopic compounds 1131

Carlos Manzanares, I, Victor M. Blunt and Jingping Peng: Vibrational spectroscopy of nonequivalent C—H bonds in liquid *cis*- and *trans*-3-hexene 1139

A. Kadiri, A. Boucetta, B. Benali et G. Nouchi: Etude conformationnelle de l'indole à l'état fondamental 1153

B. Benali, M. Fadouach, B. Kabouchi, A. Kadiri et G. Nouchi: Effet de la polarité du solvant sur les propriétés des états électroniques excités du 1,1′-binaphtyle: étude par spectroscopie UV-visible . . 1163

Huan Xu, Pamela J. Wentworth, Noel W. Howell and Jeffrey A. Joens: Temperature dependent near-UV molar absorptivities of aliphatic aldehydes and ketones in aqueous solution 1171

Ian R. Dunkin and Adam McCluskey: Tetrabromocyclopentadienylidene: generation and reaction with CO in low temperature matrices 1179

Research Note

Y. Kubozono, T. Miyamoto, T. Shinmyozu, M. Aoyagi, Y. Gondo, H. Takemura and M. Shiotani: An ESR and MO study of the butatriene and tetramethylbutatriene radical cations 1187

Instrumentation Note

SPECTROCHIMICA ACTA

PART A: MOLECULAR SPECTROSCOPY

Editors: Professor Sidney Kettle, School of Chemical Sciences, University of East Anglia, Norwich NR4 7TJ, U.K. ***Fax* 0603 507747**
Professor Jeffrey Steinfeld, Department of Chemistry, Massachusetts Institute of Technology, Cambridge, MA 02139, *U.S.A.* ***Fax* 617 253 7030**

AIMS AND SCOPE

Manuscripts dealing with both experimental and/or theoretical aspects of molecular spectroscopy, and its application in chemical problems, will be considered for publication in *Spectrochimica Acta Part A*. Subject areas include infrared, visible, ultraviolet, Raman, microwave, and photoelectron spectroscopy, nuclear magnetic and electric spin resonance, optical rotatory dispersion and magnetic circular dichroism, and neutron and light scattering. In addition to fundamental papers on molecular structure and interactions, papers dealing with applications in areas such as qualitative and quantitative analysis, surface spectroscopy, non-linear optics, laser photochemistry, aeronomy and extraterrestrial spectroscopy, instrumentation, and biochemistry are also encouraged. To be acceptable, manuscripts should possess significant timeliness and promise. Papers describing basically preparative work or a repetition of well established methodology and/or theory are acceptable only as a short note accompanying deposited data.

NOTES FOR CONTRIBUTORS

I. General

1. Manuscripts should be submitted directly to one of the Editors: *Professor Sidney Kettle* (U.K.) or *Professor Jeffrey Steinfeld* (U.S.A.). Manuscripts may be submitted by fax to either of the Editors but should be backed up by a typescript submission using normal mail to the same Editor.

2. Manuscripts should have clear scientific value and either report new data, procedures, equipment, or new theoretical considerations, as noted in "Aims and Scope" above.

3. Manuscripts must not have been published elsewhere, and authors must agree not to communicate the same material for publication in any other journal or book. For this purpose, reports or other material intended for limited distribution will not be considered as publications.

4. Special review articles will, as a rule, be prepared by invitation. The Editors will welcome suggestions for review articles, special topical issues, or conference proceedings.

II. Manuscript Preparation

1. Papers must be written in one of three languages, namely English, French or German.

2. Authors should, in preparing their manuscripts, follow the format of articles published in current issues of this Journal.

3. Authors are requested to submit an original, double-spaced, printed or typed copy of their manuscript with *two* xerox copies of both manuscript and figures. Low-quality dot matrix printers should be avoided if possible. The typescript must be neat and legible, and it is of utmost importance that contributors exercise economy in both style and presentation of data. Submission of manuscripts as camera-ready copy in correct journal format is welcomed. For detailed instructions on the preparation of CRC manuscripts see facing page.

4. Authors should, whenever possible, conform to the nomenclature, symbols, and abbreviations adopted by the commissions of such international organizations as IUPAC and IUPAP, as summarized in the following publications: N. Sheppard, H. A. Willis and J. C. Rigg, *Spectrochim. Acta* **43A,** 1 (1987); E. R. Cohen and P. Giacomo, *Physica* **146A,** 1–68 (1987); I. Mills *et al.*, *Quantities, Units and Symbols in Physical Chemistry*. Blackwells (1988).

5. Each figure submitted must be on a separate sheet, numbered with an Arabic numeral. All figures must be provided with captions, which should be typed on a separate sheet, not included on the original figure. Figures should be provided as original pen-and-ink drawings, **photographic** (not xerox copy!) prints, or laser-printed computer graphics. Authors should carefully inspect computer-produced figures for redundant and/or undersize lettering, axis labels, legends, etc., and remove or correct such lettering as needed. Descriptive detail should be included in the figure caption, not printed on the figure itself. The use of half-tone illustrations should be kept to the absolute minimum necessary. All axes must be clearly labelled, including the vertical axis of reproduced spectra.

6. All literature references should be cited in the text, using sequential citation numbers in brackets. The list of references, in numerical order, should be included at the end of the manuscript. References should include all authors' names and initials, followed by journal title in standard *World List* abbreviated form, volume, first page number and year. References to books, book chapters, unpublished reports etc., should follow standard format. Since correct references are the responsibility of the author, these should be checked carefully before the manuscript is submitted.

7. Papers must be concise without unnecessary historical introduction. An abstract in English must be provided, and an abstract in French or German may be provided at the authors' discretion. Authors may indicate on the manuscript which parts of the text (e.g. details of experimental method, tables, appendices) may be printed in smaller type.

8. It is not possible to publish detailed programs for computer calculation. When appropriate, authors may include in the manuscript flow charts for computer programs. Authors are also encouraged to make use of the *Software Survey Section*, appearing at the back of the journal, for software distribution.

9. Page proofs will be sent to the author. Authors are advised to check their proofs very carefully and to initial them before returning to the publisher. Only essential corrections should be made. At proof stage, alterations, other than printer's errors, may be charged to the author. It is important where multiple authors are concerned to indicate, when submitting the paper, the author to whom correspondence and proofs should be sent. No page charges are assessed and 25 reprints will be furnished at no charge to the author.

10. The original manuscript will be discarded after publication, unless the publisher is requested to return original material to the author.

11. *Deposited Documents*. From time to time, we receive manuscripts which contain extensive tabular or graphical data. While such data may be of archival interest, and should be available to workers in the field, constraints on production and distribution of the journal often make it impractical to publish such material in its entirety. For this reason, we have entered into a supplementary data deposition scheme with the British Library Document Supply Centre, details of which have been given on the last page of *Spectrochimica Acta* **43A,** No. 6 (June, 1987). Authors are encouraged to avail themselves of this service when appropriate. Persons wishing to obtain copies of deposited material should write, citing the accession number, directly to Service Enquiries, British Library Lending Library, Boston Spa, Wetherby, West Yorks LS23 7BQ, U.K.
